WELCOME

You will be surprised at how much more we can offer you!

We put the customer in the focus of our daily business: Their personalities, their ideas and individual demands are the benchmarks of our success. We are only satisfied when our customers enjoy our products and services.

We develop and manufacture the hardware to connect, to fasten, to tension technical textiles.

85% of our products are manufactured on our own production lines.

Being a family owned enterprise in the fourth generation MIEDERHOFF stands for the classical values of the German medium sized business: independent, stable and reliable.

Tradition and Innovation

Our experience for many decades is our basis to develop and implement new products.

A consistent high quality is most important for you and for us. A reliable service with direct contact persons, the feeling for individual customer demands, knowledge and short delivery times made Miederhoff to be the market leader today.

With our comprehensive business activities we win customers every year: small individuals, medium sized businesses and large blue chip companies worldwide.

They all appreciate our 'competence which connects'

Will you become a customer, too?

LOGISTICS

With the introduction of new products lines it was necessary to expand the warehouse capacity. To-day our products are picked, packed and labelled at packing stations and despatched with a tracking number.

With this advanced system MIEDERHOFF could improve the delivery times and more than 90% of all orders are despatched on the same day.

SERVICE

We go along with you for the complete period of your project – with our experience and competence.

From your first contact with us it is very important for us to take care for you with our services and solutions.

- professional consulting
- tools and machinery, developed and produced by ourselves
- maintenance and repairs
- service hotline
